

Garrison METL – The Garrison METL consists of 6 METL tasks. These 6 METL tasks were developed by IMA to be universally applied throughout the Army. At the Garrison level, each of these tasks are championed by Subject Matter Experts at the ASG/BSB level. These tasks are broken down into subtasks which are based on the ISR Services Performance Measures. In the future, these SMEs will develop independent or local performance measures. This Garrison METL is reported as part of the full PMR in alternate quarters.
